

## Carrier Objective

I am looking forward to work in an organization, which provides the environment for growth with competent and strong leaders in manual and automation testing having an experience in functional, API testing. I have an urge and inclination for learning new technologies, a strong work ethic combined with a commitment to excellence in all projects undertaken.

## Experience

MPOKKET(Fintech)	11/2021-03/2023
PIXELWINDTECHNOLOGIES	04/2023-till now

- Flexibility & adaptability in regards with new technologies and SDLC and STLC environments and creating confluences for product KT and making docs, excels, PPT for further usages.

- Involved in supporting prod issues and to fix the bugs.

- Experience in ,functional testing, manual testing, functional testing, GUI testing, quality control, web applications testing, mobile application testing, regression testing, sanity and smoke testing, integration testing, postman for API manual testing and also some part of the work in automation testing.

- Experience in understanding business requirements, planning, design, execution, exit report preparation, defect management and rich experience in designing the execution scenarios in testing.

- Good knowledge of agile scrum methodology, hands-on experience in jira (Defect management tool), Involved in ceremonies like daily scrum call, sprint planning, sprint review, and retrospective, bug fixing in production.

- Good experience in writing X-paths and CSS selectors to identify web elements.

- Attending grooming, town hall meetings and technical session to understand the business requirements

- Hands-on experience in API blueprint designing by using agilio, UML architecture designing of fintech & web app project, making responsive UI for all the devices, Integrating the API's without having any issues like CORS, worked on micro-services in php with angular, having MVC experience on laravel frame work of php, Integrating high security dbs like cock-roach DB, mysql to secure the data from the sql injection by using different nodes of DB. Worked on multi-threading service worker in js to run the functionalities in high scaling level. Worked on registration, login and logout functionalities by using JWT and AUTH 0 services of google. Making websites from end to end as per client requirement and making web app of fintech CRM's and service based clients by interacting in the project analysis meet with fully responsive of the UI. For web app worked on angular with bootstrap, angular materials. Worked on rank-math for ranking a website or webpage in the top SEO. For deployment I worked on bluehost, c-panel, netlify by pushing the code into git hub by using linux commands of GIT
